

TANMAY DAS

COMPUTER SCIENCE ENGINEERING STUDENT

+91 80954 30594 | tanndas1002@gmail.com | linkedin.com/in/tanmaydas6b9748273

PROFILE SUMMARY

Computer Science Engineering student with hands-on experience building autonomous AI agents and multi-agent workflows using LLMs, function calling, and workflow automation, with a focus on reliability, safety, and production-ready design.

EDUCATION

Manipal Institute of Technology, Bengaluru *Expected Graduation: 2029*

B.Tech – Computer Science Engineering

National Public School *94% (2025)*

Class XII – CBSE

- Interschool Hackathon – 2nd Place

New Horizon Public School *98% (2023)*

ICSE – Class X

SKILLS

Python Programming • Problem Solving & Algorithmic Thinking • API Integration (REST, JSON) • Workflow Automation • Data Handling & Analysis • System Design Fundamentals • Technical Communication & Documentation

CERTIFICATIONS

- 5-Day AI Agents Intensive Course with Google (Kaggle)
- n8n No-Code AI Agent Builder (Simplilearn)
- Introduction to Networking and Cloud Computing – Microsoft
- Introduction to Computers and Operating Systems and Security – Microsoft

WORK EXPERIENCE

AI Developer | Interloom *May 2026 – Present*

- Working as an AI Developer, contributing to ongoing AI development initiatives.

PROJECTS AND EXPERIENCE

Autonomous AI Support Agent *Project*

- Built an autonomous AI support agent using Python, LLMs, n8n, and REST APIs with intelligent routing, multi-scenario workflows, structured JSON outputs, and human-in-the-loop escalation based on confidence thresholds; validated through three documented test cases.
- Demo: YouTube – <https://youtu.be/y2YVWYrxIS8>

Under Secretary General – Operations *XENORA MUN*

- Led planning and execution of a large-scale academic conference, coordinating cross-functional teams and managing communication under tight deadlines.

Organizing Committee – Operations *Tech Solstice*

- Managed logistics and on-ground operations for a technical fest, working closely with multiple teams to ensure smooth event execution.

Hackathons

- SagarMitra – ORCA: Marine Ecosystem Reasoning with Collaborative Agents (Internal Smart India Hackathon, MIT Bengaluru): Built a maritime intelligence platform with AI-driven vessel route optimization, a multilingual assistant, and live ocean/satellite data and fishing-zone analytics.
- Developed a cybersecurity honeypot system at the HCL GUVI Hackathon with intelligent mechanisms to detect and analyze malicious activity.
- Built an AI-based pneumonia detection model at the Lovelace Hackathon using medical imaging, strengthening skills in rapid prototyping and applying AI to real-world problems under tight deadlines.

GirlScript Summer of Code (GSSoC) 2026 *Open Source Contributor*

- Selected for the AI Agents Track; contributing to open-source AI projects focused on intelligent systems and automation.
